 Subject: Clarification on suction tube identification and label update for AL compressors

## PRODUCT BULLETIN

We would like to inform our customers that the arrow printed on the product label is intended to identify the **side** of the suction tube. After reviewing, the label design has been updated to make this intention clear. The arrow has been repositioned and the text changed from **suction** to **suction side**. This updated label will be applied to all AL compressors produced from March 2026, onwards.

To correctly identify the tubes, consult the instruction manual or technical documents on our website, which remains the primary reference for installation and connection guidance. Additionally, we present the connections below.

**1 = Suction**

**2 = Discharge**

**3 = Process**

If you have questions that are not addressed in this bulletin, please contact your local Tecumseh sales representative or technical service team.
