Masterflux Products Change

LOGO, LABEL AND COMPRESSOR COLOR UPDATES

Tecumseh Products Company LLC would like to inform our valued customers of a strategic initiative to standardize branding across all internal business units, product platforms, and legacy Masterflux offerings. As part of this global alignment, Tecumseh is transitioning to a unified brand identity, which includes the adoption of the new Tecumseh logo across all product families, as well as the standardization of black as the only color for its compressors.

This initiative is designed to reinforce a consistent market presence, simplify brand recognition, and support Tecumseh's long-term growth strategy by consolidating its portfolio under a single, cohesive identity.

As a result, updates to product labeling, packaging, and compressor color will be implemented progressively across Sierra compressors, controllers, and associated packaging. **These changes are cosmetic and branding-related only, and do not impact product performance, specifications, or quality**.

UPDATES DESCRIPTION

Packaging
The Tecumseh logo has been implemented on all Masterflux product packaging (single-pack and controllers). Existing inventory with the Masterflux logo will continue to be used until depleted. As a result, customers may receive either packaging version during the transition period, with no defined cutover date. Please refer to page 2 for a visual comparison of the previous and updated logo versions.

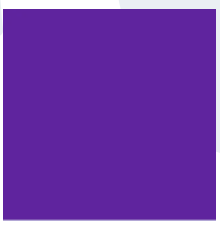

Compressors
The Masterflux logo and label on all Sierra compressors will be updated to the Tecumseh logo and label. Starting with production on October 1, 2026, all Sierra compressors will transition from purple to black color. Customers may continue to receive purple compressors after this date until existing inventory is depleted.

Controllers
The Tecumseh logo will be incorporated into the labels of all new controller versions as they are released. Existing controller versions will retain their current Masterflux labeling.

UPDATES DESCRIPTION

Previous Masterflux logo and Sierra compressor color

MASTERFLUX

purple color

New Tecumseh logo and standardized compressor color

tecumseh

black color
